

Governmental Policy

Stanford Presentation -

I Introduction

A. Gore

B. Bernie O'Neill

C. Why we are here -

1. Primary Smoking -

2. ETS - Gore / O'Neill

3. Addiction - B & O

4. I'm sponsored research

D. Short presentations - leave time for Qs & As.

E. Our position on 3 issues.

II Primary Smoking.

A. Primary scientific bases for claims.

B. Questions that still exist - Anomalies.

1. Animal inhalation studies.

2. Population anomalies - Cohort studies.

3. Most smokers do not get diseases.

4. Other factors leaving smoking as a risk factor but it is an overstated risk factor.

5. Molecular biology - Oncogene, DNA adducts, Cellular repair mechanisms.

C. 400,000 deaths.

D. Possible benefits.

E. Free Choice.

~~III ETS~~

~~Studies.~~

III Addiction

Thank you for inviting us. We recognize that you have not chosen the easy way out - if you had you wouldn't have invited us - no one is going to criticize you for selling your stock. We are not here to convince you of the correctness.

III ~~Conclusion~~ - ETS.

Why this is a spurious claim.

IV Group Names Research efforts.

- Primary data -
- 1. Questionnaire
 - 2. Can serve as a guide to guide health policy.
 - 3. Over 100,000 data.
 - 4. Interpretation Analysis.

- (5) Our response -
- a. Information
 - b. Analysis
 - c. Other factors.

NCI/TW9.

- ETS
- 1) Location
 - 2) Chemical descriptors
 - 3) Active effects
 - 4) 4 Q

We want to engage in a debate discussion.

Clear All - so that around long range Policy.
